

I believe the people of Kearney need:

- My voice at council - dedicated to represent the issues and concerns of residents of all the seasons
- Responsible levels of taxation
- Review of voting method
- Improved access to council by reinstating question period, revising time of council meetings and improving communication
- Reduction of number of councillors to four in 2014, in line with similar municipalities
- Enhanced compliance of bylaws and Official Plan through bylaw review, improved awareness and enforcement
- Responsible land and resource development with preservation of the health of our lakes and lands as a priority

Since appointed as councillor in December of 2008, I have represented you at council by:

- Introducing Carbon Monoxide detector bylaw
- Striving to enhance the compliance of the Official Plan and enforcement of the associated bylaws
- Fighting for "out of town" access to vote
- Working towards a responsible 2010 budget
- Listening to you and bringing your concerns to council
